

Murilo Martins

Cloud & Infrastructure Engineer | Microsoft Certified: Azure Administrator Associate (AZ-104)

Jundiaí, São Paulo, Brazil | +55 11 99669-7230 | murilo.gmartins@outlook.com | [linkedin.com/in/murilo-martins-0b9938186](https://www.linkedin.com/in/murilo-martins-0b9938186)

■ Open to 100% Remote Roles | Independent Contractor (B2B / W-8BEN for US & Autónomo for Spain)

PROFESSIONAL SUMMARY

Certified Microsoft Azure Administrator (AZ-104) and **Cloud & Infrastructure Engineer** with 4+ years of hands-on experience designing, securing, and maintaining enterprise infrastructure, cloud environments (Microsoft Azure), networking architectures, and cybersecurity operations. Demonstrated expertise in deploying enterprise firewalls (Fortigate with FSSO), SIEM and proactive monitoring (Wazuh, Zabbix), Identity & Access Management (Active Directory/IAM), isolated ransomware-resilient backup solutions, and task automation using Python, Bash, and PowerShell. Experienced in supporting mission-critical N1–N3 operations and collaborating within international remote teams with high security and availability standards (ISO 27001).

CERTIFICATIONS & CONTINUING EDUCATION

- **Microsoft Certified: Azure Administrator Associate (AZ-104)** — Active certification (Valid through Apr 2027)
- **Microsoft Certified: Azure Fundamentals (AZ-900)** — Microsoft Official Certification
- **Google Cybersecurity Professional Certificate** — Coursera
- **Professional Pentesting Course (250h)** — Solyd Offensive Security
- **Linux Administrator (140h)** — IGTI
- **Specialized Training:** Advanced Networking (Cisco/Fortigate), Python Automation, Cloud Computing, Linux Servers, ISO 27001 Information Security Management

TECHNICAL SKILLS

Cloud & Virtualization:	Microsoft Azure (VMs, VNets, Storage, IAM, Entra ID), Proxmox VE, Docker Containers, Terraform & IaC fundamentals
Operating Systems:	Linux (Debian, Ubuntu), Windows Server (2016/2019/2022), Windows 10/11, macOS
Networking & Protocols:	Cisco, Mikrotik, Ubiquiti UniFi, Site-to-Site & Client VPNs (OpenVPN, IPsec), DNS, DHCP, VLANs, TCP/IP, Routing
Cybersecurity & SIEM:	Fortigate (FSSO, UTM, Web Filtering), PfSense, Palo Alto, Wazuh SIEM, Security Onion (Zeek/Suricata), Microsoft Defender for Endpoint (EDR), ISO 27001
Monitoring & ITSM:	Zabbix (Infrastructure & SNMP monitoring), GLPI (Ticketing & Asset Management), Syslog analysis
Scripting & Automation:	Python (automation, API integrations, data processing), Bash scripting, PowerShell, SQL
Infrastructure Services:	Active Directory (AD DS), Group Policy (GPO), Identity Access Management (IAM), Samba, Apache, Nginx, Disaster Recovery

PROFESSIONAL EXPERIENCE

G.A.G. Electronics Recycling	Dec 2025 – Present
Infrastructure & Cloud Security Specialist (Promoted from IT Assistant)	Jundiaí, SP, Brazil
• Architected enterprise Fortigate firewall policies with FSSO and Active Directory integration, enforcing identity-based access control and zero-trust perimeter security. • Engineered an isolated, immutable backup infrastructure and disaster recovery strategy, eliminating single points of failure and ransomware vulnerabilities. • Deployed and managed Wazuh SIEM and Zabbix infrastructure for centralized log correlation, anomaly detection, and proactive 24/7 alerting, reducing MTTR by 40%. • Administered Microsoft Azure cloud workloads, hybrid networking, and Windows/Linux server environments, maintaining 99.9% operational availability. • Implemented GLPI as an enterprise IT Service Management (ITSM) platform, standardizing workflows, user onboarding, and SLA tracking. • Designed and deployed Ubiquiti UniFi enterprise network architecture, significantly boosting Wi-Fi coverage, throughput, and connection stability. • Built and configured high-availability Proxmox virtualization clusters to host mission-critical internal applications and databases.	

- Configured secure remote access infrastructure combining Linux OpenVPN gateways and self-hosted RustDesk with private key-based encryption.
- Deployed Security Onion network security monitoring for deep packet inspection, IDS/IPS alerting, and Layer-2 traffic visibility.
- Rolled out Microsoft Defender for Endpoint across corporate devices, centralizing EDR policy management and threat remediation.
- Led N1–N3 technical support operations, resolving critical system incidents and providing technical leadership on infrastructure upgrades.

G.A.G. Electronics Recycling
Technical Electronics Assistant

May 2025 – Dec 2025
Jundiaí, SP, Brazil

- Conducted detailed hardware diagnostics, component testing, and technical repairs on enterprise IT equipment and server components.
- Streamlined internal processes for equipment lifecycle management, classification, secure data erasure, refurbishing, and sustainable hardware disposal.

Definity Tecnologia
IT Support Assistant

Sep 2024 – Dec 2024
São Paulo, Brazil

- Provided fast-response remote technical support and resolved complex service requests across multi-tenant client environments.
- Configured and maintained secure corporate VPN tunnels, facilitating stable multi-site connectivity and secure remote access.
- Administered Active Directory users, security groups, and access permissions in strict adherence to least-privilege security principles.
- Supported business-critical enterprise applications, digital certificates (PKI) deployment, and networked printing systems.
- Executed preventive maintenance, operating system hardening, and patch deployments on Windows and Linux workstations.

GreenTec I.T Solutions
IT Support Technician (Tier 1 & 2)

Jul 2021 – Sep 2023
São Paulo, Brazil

- Delivered Tier 1 and 2 technical support and incident management for internal and remote users, accelerating first-contact resolution rates.
- Administered Active Directory domains, user provisioning, Group Policies, and managed production Windows Server and Debian Linux systems.
- Configured and maintained core network services including corporate VPNs, DNS, DHCP, and applied systematic operating system security patches.
- Developed custom Python and Bash scripts to automate scheduled backups, routine administrative maintenance, and disk space alerting.
- Monitored network and server infrastructure health, authored detailed SOP documentation, and maintained complete IT asset lifecycle tracking.
- Provisioned and managed virtualized testing and production environments, supporting software installation and hardware refreshes.

EDUCATION

Bachelor’s Degree in Computer Networks — Impacta Tecnologia
Postgraduate Program in Cloud Computing with Artificial Intelligence — XP Educação
Cybersecurity (Undergraduate Degree Program) — FATEC Jundiaí
Technical Degree in Information Technology — Senac Jundiaí

Completed: Jun 2025
In Progress
Expected: Jun 2027
Completed: Mar 2022
